

## Kaufman & Robinson, Inc. RoHS Statement

Dear Valued Customer,

Kaufman and Robinson, Inc. (KRI) is a manufacturer of ion sources and ion source controllers that are specifically designed to power and control plasma processes. KRI has evaluated our equipment per the requirements of the RoHS 2 Directive 2011/65/EU and believes our equipment is outside the scope of this directive. Article 2, Section 4 lists the equipment to which this directive does not apply:

(c) equipment which is specifically designed, and is to be installed as part of another type of equipment that is excluded or does not fall within the scope of this Directive, which can fulfill it's function only if it is part of that equipment, and can be replaced only by the same specifically designed equipment

(d) large stationary industrial tools or

(e) large-scale fixed installations.

(j) equipment specifically designed for research and development purposes.

After close examination of the RoHS 2011/65/EU Directive, KRI has determined that this directive does not apply to any equipment manufactured by or marketed by KRI.

Although we are currently outside the scope of this directive, KRI has been designing products to meet RoHS directives for many years and is working towards implementing processes and tools to meet reporting requirements per the RoHS Directives in case market requirements change. KRI continues to monitor customer needs and compliance directives to ensure delivery of products to our customers.

As always, thank you for your continued support.
